ABOUT ME

I am a final year student pursuing Bachelors of Technology in Computer Science. I am a vivid learner and always curious to learn about new technologies, and I am also a software developer, frontend web developer. I enjoy the process of learning and building new stuff. Whenever I am not coding, I like to read books, cook and blog. My objective is to keep learning in life and never stop, I would love to contribute my knowledge, skills for the success of an organization. I have worked in an NGO also was a member of an organization in my college who hosts various events and I have learnt team management, time management, leadership, etc.
